SEVA INNOVATION CHALLENGE 2026 • PITCH DECK TEMPLATE

[Name of Your Innovation]

[One line: what it does, for whom — e.g. "A low-cost sensor that warns farmers of pest attack 5 days in advance"]

How to use this template

- Keep to 6 slides, in this order.
- Replace all grey [bracketed] text with your own content; delete guidance boxes.
- Use simple language, facts and numbers with sources.
- Add photos of your prototype or field visits wherever possible.
- Save as PDF (max 10 MB) before uploading.

2

The Problem

What real challenge in society, government service or industry are you solving?

ATLAS SKILLTECH UNIVERSITY

What is the problem?

Describe the problem in 2–3 simple sentences. Focus on the root cause, not just the symptom.

Who is affected, and where?

Name the people, community, department or industry facing it; mention the location (village, city, district).

Evidence

Give data from credible sources — Census, NFHS, government reports, departmental records, or your own survey (sample size and date).

Current gaps

What is being done today and why it is not enough (cost, reach, speed, quality)?

[X (number)]

[people / farmers / students affected every year in the target area]

Why it matters

[One line on the cost of inaction — lives, money, time or environment]

3

Our Solution & Innovation

What have you built or designed, how does it work, and what is new about it?

Our solution in brief

[Explain the product, service, process or technology in 3–4 lines. Add a photo, sketch or screenshot of the prototype on the right of this text if available.]

How it works

1 — Input

[What goes in / who uses it]

›

2 — Process

[What the solution does]

›

3 — Output

[Result for the user]

What makes it new?

	Existing approach	Our approach
Cost	*[₹ ___]*	*[₹ ___]*
Speed / time	*[___]*	*[___]*
Reach / access	*[___]*	*[___]*
Ease of use	*[___]*	*[___]*

Key USP

[The one thing your solution does that others cannot. Mention any patent filed / granted, if applicable.]

4 Feasibility & Implementation

How ready is the solution, and what will it take to implement it on the ground?

ATLAS SKILLTECH UNIVERSITY

Current stage (mark ✔ where you are today)

- ○ Idea
- ○ Proof of Concept
- ○ Working Prototype
- ○ Field Pilot
- ○ Ready to Deploy

Technology

Hardware, software, materials, lab or field facilities used or needed.

Estimated cost

Cost per unit / per user and total cost for a pilot. Show how it is affordable.

Timeline

Key milestones for the next 3, 6 and 12 months.

Partners

Government department, PSU, local body, industry or NGO that will adopt or pilot it.

5

Impact & Scalability

What change will your solution create, and how can it grow beyond the first location?

[_____]

Beneficiaries reached

[in first year of implementation]

[__ %]

Saving in cost / time

[compared to current practice]

[_____]

Jobs or livelihoods

[created or supported]

Social impact

Effect on quality of life, safety, inclusion (women, rural, divyang), or environment.

Sustainability

How the solution will run long-term — revenue model, user fee, CSR or department budget.

Scale-up plan

How it can be replicated in other districts or states, and what is needed to do so.

6

Team/Individual & Support Required

Who is behind the idea, and what help do you need from the Challenge?

ATLAS SKILLTECH UNIVERSITY

[Mentor / faculty guide, if any: Name, designation]

Thank you | [Contact email / mobile]

Support we are seeking

- ☐ Mentorship & technical guidance
- ☐ Pilot with a government department
- ☐ Funding / grant support
- ☐ Incubation & workspace
- ☐ Testing, certification or IP support

[In one line, how the Challenge support will take your solution to the next stage.]
